Bringing together researchers, technologists and educators, the book explores how technology can best be designed and used for learning and teaching. It addresses what research says about:

- how and why learning happens, and how different technologies can enhance it
- engaging all learners through technology and helping them benefit from it
- how technology can support teaching.

An accessible introduction to learning and teaching with technology for teachers and other educational professionals, whatever their experience with using technology for education.

£24.99 • 366 pages • January 2018 • UCL IOE Press • **Paperback** • 978-1-78277-226-2

Enhancing Learning and Teaching with Technology

What the research says

Edited by **Rosemary Luckin**

CONTENTS

General Introduction: How research is reported in the news.

PART 1: LEARNING. Introduction: What the research says about how and why learning happens; 1.1 The role of genetic inheritance in how well children do in schools; 1.2 The value of self-tests and the acknowledgement of uncertainty; 1.3 Context and learning.

PART 2: THE USE OF DIFFERENT TECHNOLOGIES TO ENHANCE LEARNING. Introduction: What the research says about the use of different technologies to enhance learning; 2.1 The new Computing curriculum in England; 2.2 Using game design for learning; 2.3 Citizen science and informal learning; 2.4 Video for learning; 2.5 Learning when out and about; 2.6 Learning with iPads: 'Makes learning fun'.

PART 3: ENGAGING LEARNERS THROUGH TECHNOLOGY. Introduction; 3.1 Unintentional learning: Are digital games friends or foes? 3.2 Issues of academic integrity around digital learning and assessment; 3.3 Improving learning through engaging spaces.

PART 4: HELPING LEARNERS GET THE MOST BENEFIT FROM DIGITAL TECHNOLOGY. Introduction; 4.1 A contemporary digital capabilities framework; 4.2 Tablet devices in education: Beyond face-value; 4.3 The maker movement and schools; 4.4 Learning across locations and settings.

PART 5: TECHNOLOGY FOR ADULT LEARNERS IN AND BEYOND FORMAL INSTITUTIONS. Introduction; 5.1 Technology, the Internet and adult participation in learning; 5.2 MOOC development: Priority areas; 5.3 Widening adult learning participation.

PART 6: HOW TECHNOLOGY CAN SUPPORT TEACHING. Introduction: What the research says about how technology can support teaching; 6.1 Learning analytics, artificial intelligences and the process of assessment; 6.2 Artificial intelligence and big data technologies to close the achievement gap; 6.3 Technology to provide educational practitioners with the expertise they need.
